

**The 2006 Sandler Postdoctoral Fellows were:**

BASIC RESEARCH FELLOWS

1. Quinn Mitrovich - "Splicing regulation and virulence in *Candida albicans*"
2. Maya Schuldiner - "Exploring regulation of ER homeostasis in human cells using RNAi and quantitative genetic interaction maps"
3. Bjoern Schwer - "Role of SIRT3 in the regulation of mitochondrial metabolism"
4. Matthew Sullivan - "How are meiotic crossovers formed?"
5. Ahmet Yildiz - "Elucidating the role of motor proteins in intraflagellar transport"

TRANSLATIONAL RESEARCH FELLOWS

1. Robert Froemke - "Synaptic repair of cortical circuits after developmental neurotoxicity"
2. Jean Regard - "Ablation of Gi function in beta cells in vivo provides a model of chronic hyperinsulinemia"
3. Sarah Tao - "3D reconstruction of complex retina architecture"
4. Minh To - "The role of Kras2 in human lung cancer progression"

**The 2006 proposals were reviewed by a panel of 9 UCSF Faculty members:**

1. Abul Abas
2. Allan Balmain
3. Jeffrey Cox
4. Steven Finkbeiner
5. Wallace Marshall
6. Daniel Minor
7. David Pearce
8. Anita Sil
9. Christine Yaffe
